---

**STARTRITE MACHINE SPECIALIST**  
**SUPPLIERS OF NEW STARTRITE MACHINES / SPARE PARTS & BLADES**

**PRECISION UPPER ROLLER GUIDE TO SUIT THE  
RECORD POWER  
BS300E – BS350S – BS400 MODELS**

BS300E/BS350S = PART NUMBER RPRG1 = £75.00+VAT  
BS400 = PART NUMBER RPRG2 = £89.00+VAT

These precision roller guides are manufactured in the UK specifically for the Record Power models BS300E – BS350S – BS400, refer to the chart below for models and recommended blade widths.

There is NO drilling, filing or any modification required unlike many cheap after market guides currently on the market.

Manufactured in steel and aluminium, these guides will make a very good saw even better, they give superb blade control have low heat generation to the blade and produce no sparks.

Both side support rollers and thrust roller are adjusted by a cam system giving precision setting longer, and allows full contact to the blade, this eliminates any blade twist, cutting contours will particularly appreciate the blade control.

Available in the upper guide assembly as this takes on 80% of the work.

Please Note These Roller Guides Will Reduce Cutting Height by 50mm

RECORD POWER MODEL	RPRG1 RECOMMENDED BLADE WIDTH	
	MAX	MIN
BS300E	3/4"	1/4"
BS350S	3/4"	1/4"
BS400	1"	1/4"
