

STARTRITE 'S' RANGE VERTICAL BANDSAWS

STARTRITE

THE SAFER CHOICE IN
WOODWORKING

The Startrite standard in performance, reliability and safety

Blade guidance system

Startrite, the UK's leading manufacturer of vertical bandsawing machines provides new levels of performance, reliability and safety with the 'S' range. These versatile single and two speed vertical bandsawing machines provide an unrivalled range of capacities and the ability to accurately cut soft and hard woods, plastics and non-ferrous metals using blades as narrow as 3mm for intricate work.

Durability and accuracy are guaranteed by the rugged steel body, tilting ground cast iron or steel tables, fully adjustable blade tracking and tension, ground and balanced rubber tyred bandwheels. Together with the blade guidance system which incorporates a carbide tipped thrust pad plus hardened and ground self-lubricating guide blocks.

Rip sawing

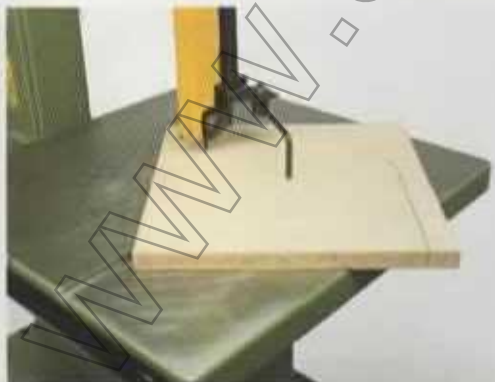

Cross cutting/mitring

Depth stop

Tilting table

Circle cutting

Roller guide system (502S)

Lockable/interlocked bandwheel doors

Dynamically balanced/ground rubber tyred bandwheels

Safety has been a prime consideration. Among the host of features offered are lockable bandwheel doors, fully guarded blade, door safety interlocks, rapid stopping, lockable electrical isolators, low voltage protection thermal overload and dust extraction coupling.

Whatever the application - professional, educational or DIY, the 'S' range from Startrite can meet all your bandsawing needs. Furthermore, by investing in a Startrite machine you also receive the extra benefits of an extensive customer support service. For technical advice, fully trained service engineers, service contracts with 24 hour call out response, speedy spare parts availability and blades to suit any job, Startrite are second to none.

With the added assurance of recognised quality standards, you're better off with Startrite - quality in every respect.

QUALITY IN EVERY RESPECT

FM 14023 BS EN ISO 9001: 1994

Machines comply with EC Directive 89/392/EEC and Supply of Machinery Regulations 1992

FEATURES

Rugged steel body and generous ground cast iron or steel tilting table for accuracy and durability.

Single and two speed variants to enable cutting of hard and soft woods, plastics and non-ferrous metals.

Durable and fully adjustable upper and lower blade guidance system. Incorporating carbide tipped thrust pads together with hardened and ground self-lubricating guide blocks for accurate cutting and long blade life. (Roller guide system on 502S).

Wide range of accessories, including reversible rip fence for safe cutting of thick/thin material, mitre fence, circle cutting attachment and depth stop.

Blade width ranging from 3mm for intricate work to 25mm for ripping large sections.

Fully adjustable blade tracking and tensioning.

Fully adjustable guarding with lockable and interlocked doors, latching emergency stop, lockable electrical isolator, low voltage protection and thermal overload.

Dynamically balanced and ground rubber tyred bandwheels.

Rapid stopping of less than 10 seconds.

Blade cleaning brush.

OPTIONS

Key switch

Low voltage work lamp

Palm/kick switch

d.c. injection brake for additional stopping power

EXTENSIVE CUSTOMER SUPPORT SERVICE

- Comprehensive one year warranty
- Rapid spare parts availability
- Fully trained service engineers
- Technical/applications advice
- Service Contracts with 24 hour call out response
- Comprehensive blade service
